

HOUSE & GARDEN PREMIUM NUTRIENTS & ADDITIVES

Flower Finishers

Induces a 2nd surge in flower production- Increasing harvest weight significantly

- ❖ Ingredients: Potassium Sulfate (K₂SO₄), Potassium Carbonate (K₂CO₃), and Potassium Phosphate (KH₂PO₄)
- ❖ Unlike other super-PK products, some of which can be classified as hazardous waste, Shooting Powder contains below detectable levels (BDL) of heavy metal content (Arsenic, Lead, Cadmium, Mercury) and passes all relevant testing
- ❖ Kinetin, a natural plant growth regulator, plays a key role in fruit ripening
- ❖ Clean, strong, and stable

Shooting Powder

- Feed Rate: 1-2 satchets per 25 gallons of water

Top Shooter

- Feed Rate: 2.8-5.7mL gallon of water
- Liquid form of Shooting Powder

Phosphorus Role:

1. Required for photosynthesis (ATP)
2. Involved in the production of lipids (oils) and carbohydrates
3. Boosts flower and root development
4. Key component of ATP (Adenosine Tri-Phosphate), a coenzyme energy carrier – fuels plant cells – “molecular unit of currency”
5. Key component of plant plasma membranes – “phospholipid bilayers” – the selectively osmotic barrier around all plant cells

Potassium Role:

1. Involved in H₂O absorption & plant recovery from H₂O loss due to evapotranspiration
2. Utilized in the formation of carbohydrates in photosynthesis
3. K is concentrated in the fruits of plants
4. Improves H₂O retention, yields, fruit taste and color, texture and plant’s immune system
5. Potash increases the pH (alkalizes) your nutrient mix, balancing the acidic nature of phosphate sources
6. Potassium Sulfate is a good source of Sulfur too

Available Sizes:

- | |
|--|
| House & Garden Shooting Powder – 5pk (CS8) |
| House & Garden Shooting Powder – 20pk (CS4) |
| House & Garden Shooting Powder – 140 Bulk (EA) |

- | |
|--|
| House & Garden Top Shooter – 250ml (CS16) |
| House & Garden Top Shooter – 500ml (CS8) |
| House & Garden Top Shooter – 1 Liter (CS6) |
| House & Garden Top Shooter – 5 Liter (CS2) |
| House & Garden Top Shooter – 20 Liter (EA) |
| House & Garden Top Shooter – 60 Liter (EA) |

Tips:

- Use alongside Bud XL for an unmatched 1-2 punch to increase yields, resin production and improved flavor
 - Do not reuse coco or soil after using Shooting Powder without proper treatment
 - Do not use at the same time as Top Booster – too much P-K!
